## DÉCORTECH FIRESAFE RADIATA PLYWOOD

The latest addition to our Firesafe range is Décortech Firesafe Radiata Plywood, rated ASNZ 1530.3 (0, 3). Complying with the most stringent fire code requirements it is ideal for use in entrance and exit ways, especially for schools, hospitals, commercial and public spaces.

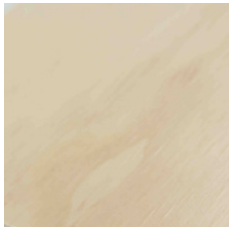

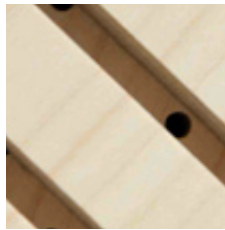

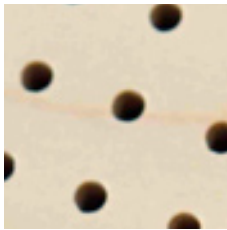

The first hard wearing fire resistant solution for timber plywood Décortech Firesafe Radiata Plywood is a pre finished panel that retains the look and beauty of natural wood (when clear coated) with the safety of fire retardancy.

Combined with Décortech stylish customised perforations and Decoustic felt backing Décortech Firesafe Radiata Plywood can provide perfect acoustic qualities for any space.

### Why Wood?

Décortech specialises in decorative timber panels utilising the many benefits of wood, including its renewability, sustainability, energy efficiency, and natural elegance.

Timber provides a modern, warm and elegant workplace where wood is enhanced by our Décortech factory applied clear UV finish.

Décortech Firesafe Radiata Plywood is available in a range of stylish finishes and perforations.
