

DV-VR01-031

HIGH SECURITY INTEGRATED BASIN

DESCRIPTION

The Franke DV-VR01-031 is a high security basin with integrated water outlet in the upstand, designed and tested to be vandal-proof and avoid ligature points wherever possible. A high-grade non-porous polyester gel coat surface in all white comes as standard. The gel coat has been specially formulated to resist chemicals and ultraviolet rays. This model is suited to be installed with MacDonal Security basin control sets available in electronic or mechanical.

Features include integrated spout for mixed or hot and cold water supply, rear concealed waste outlet, domestic aesthetics, moulded impact resistant construction, vandal and ligature resistant.

Ideal for use in applications requiring a high degree of vandalism protection including prisons and mental health facilities, which require water consumption minimisation.

Water controls can be mounted on the upstand (as shown) or mounted above the basin on the wall. Refer to separate tap literature for a suitable electronic or mechanical water control option.

Basin is designed for through wall mounting where duct access is available directly behind basin. Alternatively use

inwall bracket ensuring access panels are available above and below basin for water and waste connection.

INSTALLATION

- Through wall mounted high security basin with integrated stainless steel spouts.
- Flow restricted to 5L/min.
- Dimensions 450 x 374 x 300mm (W x H x D).
- Substantially reduced ligature risk.
- High performance composite material.
- Rear concealed horizontal 32mm waste outlet.
- Optional inwall mounting bracket (order separately).

MODELS

- DV-VR01-031 - High security integrated basin
- DV-VR01-UBB - Inwall mounting bracket (refer separate literature)
