What makes a practical kitchen?

The kitchen you opt for will last you for 15 years or more. So put time and thought into your purchase – don't just focus on design. Kitchens that are fit for everyday use are not only beautiful but also practical.

They have the following features:

- Efficient workflow (ergonomics)
- Optimum space utilisation (storage space)
- Enhanced convenience (motion)
- Freedom for your ideas (design)

Blum helps to enhance your home with innovative fittings, clever cabinet solutions and useful kitchen planning expertise.

- 28 Other products
- 29 Blum Inspirations
- 30 moving ideas

Ergonomics – Make your life easier

Clearing away shopping. Laying the table. Unloading the dishwasher and, naturally, cooking. Meal preparation and clean-up are daily recurring activities or 'workflows'. To make your life easier, ask yourself what your habits are right from the start when planning your kitchen.

Five work zones

Kitchens can be divided into five zones to cater for typical tasks. This means that you can keep everything exactly where you need it, shortening distances and saving you valuable time.

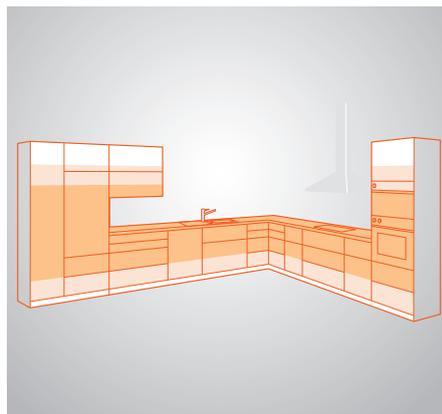

Use lift systems and drawers instead of doors

Make your kitchen ergonomic: use full extension drawers and pull-outs. They give you clear visibility and easy access to contents. No more hunting for things!

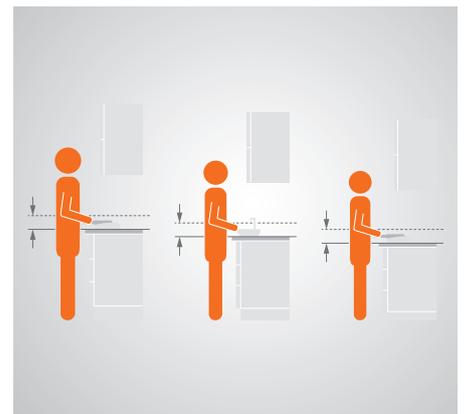

Practical inner dividing systems

Nice and tidy. Flexible inner dividing systems ensure that kitchen utensils, cutlery, odds and ends, open packs of food and even heavy jars of provisions are immediately to hand.

Ideal storage place

Certain items are used more often than others. Keep those you use all the time at an easy-to-reach level. Store the items you seldom use in other areas.

Healthy posture

Apply good ergonomics and make sure the height of your worktop area is right for you.

Storage space – Everything exactly where it should be

You can never have too much storage space, especially when it comes to kitchens. What to do if you have a small floor plan? Use every inch available and conjure up extra space! It's easy with clever cabinet solutions that provide ample storage space – just like that.

Extra space

Create unexpected storage space! A special sink pull-out makes full use of the space around the sink, perfect for items such as cleaning supplies.

Customised storage space

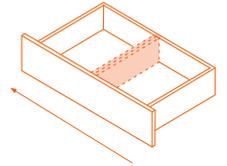

The SPACE TOWER pantry unit can be tailored to your personal needs. Ideal for those living on their own and large families.

Create more storage space

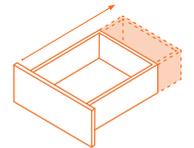

up to **+15%**

with wider units

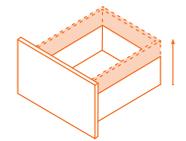

up to **+30%**

with deeper drawers

up to **+55%**

with higher side panels

Corner storage space

Never before has it been so easy to use corner space in your kitchen. Check out the SPACE CORNER cabinet with drawers!

No leftover space

The SPACE TWIN narrow cabinet securely holds bottles, chopping boards and baking sheets, and keeps everything nice and tidy.

Storage space in the plinth

With SPACE STEP, you can even create extra storage in the toe kick of your cabinetry – don't waste an inch of space.

Quality of motion – Supreme ease

Make sure your new kitchen feels good. Use wall cabinets, doors and drawers that open with ease, close softly and effortlessly. This is where top-quality fittings technology comes in. You'll feel the difference. Try it out for yourself!

SERVO-DRIVE

Electrical one touch opening with soft close.

The electrical opening support system for drawers and wall cabinets is the ultimate in user convenience. Also available as a single set for refrigerators and freezers, dishwashers and waste bin pull-outs.

TIP-ON BLUMOTION

Mechanical press to open with soft close.

This innovative technology combines mechanical one-touch opening with soft and effortless closing for handle-less drawers.

BLUMOTION

Soft closing motion.

The beauty of silence in a hectic home. Drawers, doors and wall cabinets close softly and effortlessly. Most Blum products have BLUMOTION already integrated as a standard.

TIP-ON

Mechanical press to open and press to close.

If you don't want handles, mechanical press to open for doors and wall cabinets is affordable and ideal. To close, press shut.

Add that personal touch and bring your dream kitchen to life. We have the right products to bring a better quality of living to every room.

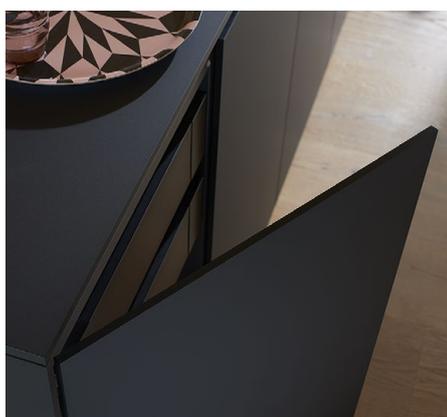

Dark surfaces

Showcase your furniture creations with Blum products. Whether you want to achieve a harmonious balance, or create daring contrasts, dark fittings bring design to your kitchen furniture interiors.

Handle-less furniture

Four motion technologies for wall cabinets, doors and pull-outs open up infinite possibilities for handle-less furniture. Be inspired by sleek design and enhanced ease of use.

Thin fronts

Achieve a sleek aesthetic for thin fronts. Blum allows you to implement fronts with a thickness of 8 mm or more in a wide range of materials thanks to the EXPANDO T fixing method.

Wide fronts

Furniture with wide fronts is becoming increasingly popular. Our fittings ensure high stability and smooth running characteristics, regardless of the size and weight of the fronts.

Design – Turn your creative ideas into reality

Help your kitchen designer

Start our free Zone
Planner now:

[www.blum.com/
zonenplaner8](http://www.blum.com/zonenplaner8)

It's a good idea to consider a few basic things in the run-up to planning. Tell your kitchen designer what your needs and requirements are so that you get what you want. There are a number of factors that can impact the design of your new kitchen.

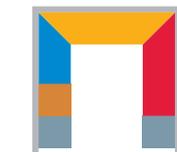

Personal space requirements

Use the Zone Planner to quickly and easily establish how much storage space you'll really need in your new kitchen.

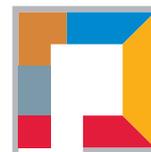

Simple workflows in your kitchen

Every kitchen can be divided into five work zones – regardless of size or shape. For right-handed people, the consumables, non-consumables, cleaning, preparation and cooking zones are arranged clockwise. If you're left-handed, it's the other way around.

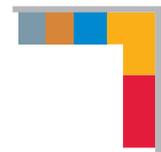

-  Consumables
-  Non-consumables
-  Cleaning
-  Preparation
-  Cooking
