Noise	49dB(A)
Install Location	Wet rooms
Minimum Clearance	200mm
Rooms Served	One
Ventilation Type	Intermittent Extract
Filter	NA
Control	Wall Switch, Single Speed
Power	50W
Add-ons	<ul style="list-style-type: none"><li>• Timer</li><li>• Humidity Sensor</li></ul>

## PRODUCT DESCRIPTION

Bathroom extract system installed with a Roof Mounted Exhaust using an In-line Fan for 1 Room, duct run up to 3m.

## KEY BENEFITS

- Pre-packaged System: We've done the work for you so you know which system you'll need to do the job
- Smart Installation: Roof penetrations often offer the path of least resistance for ducting, which in turn leads to more efficient performance from fans
- Quieter performance: Remote mounted fans mean the noise and vibration is further away from the occupant, not at the perimeter of the space.
- Peace of mind: backed up by a 10-year leak proof guarantee

## APPLICATIONS

\*This system is suitable for, but not limited to the following areas:

- Single room intermittent extract for bathrooms or other wet rooms.

## PRODUCT COMPLIANCE

- G4: Extract air volume exceeds 25l/s for bathrooms and/or 40l/s for laundries.
- Healthy Homes: Bathroom Ventilation
- B2, E2
- BRANZ appraisal 665

## ELECTRICAL

- Electrical connection excluded.
- All fans to be connected to an isolating switch as per AS/NZS 3000:2018.

## WARRANTY

- 10 Year LEAK PROOF GUARANTEE
- 10 Years for Materials and Workmanship
- 1 Year Fan Motor

Terms and conditions apply.

## EXPANSIONS / ALTERNATIVES

- HTBKTRILFC : for fire Rated Ceiling
- HTBKTR : Alternative using roof mounted fan
- HTBKTRSK : Alternative for use in no cavity/skillion ceiling applications

## LIMITATIONS

- Minimum of 200mm between ceiling and roofline is required.
- Sufficient replacement air is required for extract efficiency. Replacement air can be achieved through undercut to doors of all rooms, 20mm minimum on bathrooms - 10mm on bedrooms.

## INSTALLATION

To be carried out by Hometech to manufacturer's recommendations:

- Ceiling diffuser to be located as close to outside edge of shower enclosure where applicable. For shower over bath
- Diffuser to be as close to centre of bath.
- Fire protection available that is compliant to AS/NZS 15304.4:2014.
- Duct should not be squished or taken around tight bends.
- Allow roof access for future maintenance.

## MAINTENANCE

- At regular intervals following installation, the fan should be inspected and cleaned to ensure there is no build-up of dirt or other deposits. It is recommended this is done as part of a scheduled yearly maintenance program.
- The face can be cleaned without removal by wiping the inlets and front face with a damp cloth.
- If any problems arise, please contact your installation professional.
