

Firesafe Décorply Plywood.

Firesafe Décorply Plywood is a lightweight, dimensionally stable substrate which boasts superior edge detailing for an impeccable aesthetic finish. The white glue line ensures a clean, light edge, making it the perfect solution for your most sophisticated decorative applications.

Top-Tier Fire Safety:

Group 1s Fire Rating ensures maximum safety and compliance with compromises.

Dimensions:

Sheet size: 2400 × 1200
Thickness: 12mm, 15mm

Acoustic Perforations:

Firesafe Décorply is an ideal material to specify for acoustic attenuation as plywood is a good acoustic absorber due to the thin wall cellular structure which absorbs the energy from sound waves. When combined with our standard perforations or any custom designs it is possible to achieve perfect acoustics for any space. Additionally, Decoustic 85 felt is bonded to the back of the panels as standard to further increase the acoustic properties.

Finishes available:

Choose from a range of custom finishes including Clear, Nude, Blonded, Whitewash, Ivory, Mineral Tint of Brown, Blackwood, Harvest, Walnut, London Grey, First Avenue & Nordic available in Satin or Matte.

Sustainable Design:

Big River Panels sources all Plywood from sustainably managed forests with FSC or PEFC certifications.

Precautions & Limitations:

Décorply plywood panels are for interior applications only, they are not recommended in exposed, damp or wet conditions as they can swell and break when in contact with water. They may warp or expand if not sealed. Décorply Panels may have significant colour variations from batch to batch.
