

## Hoop Pine Interior Grade Plywood

Hoop Pine Interior Grade Plywood is a premium grade plywood with a fine, even grain. Pressed at low temperatures to preserve a lighter, cleaner and more even face, it has an excellent edge detail and is ideal for decorative applications.

### Grading:

Hoop Pine is carefully selected for a high quality decorative finish and is ideally suited to high end architectural applications. AC grade is suited to ceiling and wall panels and AA grade is suitable for double-sided applications, such as screens and partitions, especially where the exposed edge is featured.

### Dimensions:

Sheet size: 2400 × 1200 available in 9mm 12.5mm, 16mm

Sheet size: 2700 × 1200 available in 9mm 12.5mm, 16mm

Density: 600 kgs/m<sup>3</sup>

### Acoustic Perforations:

When combined with our standard perforations or any custom designs it is possible to achieve perfect acoustics for any space. Additionally, Decoustic 85 felt is bonded to the back of the panels as standard to further increase the acoustic properties.

### Finishes available:

Panels come pre-finished by our Paintline as standard. Hoop Pine is finished with factory applied UV Clear to enhance the natural beauty of the timber. Satin, Matte & Ultimatte Finishes are available.

### Sustainable Design:

Hoop Pine is the perfect environmental choice as it is manufactured to AS/NZS 2270 standard and is 100% sourced from sustainable, plantation grown forests with an E0 formaldehyde rating.

### Precautions & Limitations:

Hoop Pine Interior grade panels are for interior applications only, they are not recommended in exposed, damp or wet conditions. It is not possible to guarantee an absolute consistency in colour of plywood between sheets. A slight variation between sheets cannot be considered a defect.
