

Firesafe MDF

Firesafe MDF allows timber panels to be used in spaces that they previously could not be due to fire requirements and provides a cost effective fire rated solution. It is ideal to use when the aesthetic qualities of wood or a high quality paint finish are desired with the safety of a fire retardant solution.

Top-Tier Fire Safety:

Group 1s Fire Rating ensures maximum safety and compliance with compromises.

Dimensions:

Natural Firesafe MDF

Sheet size: 2400 × 1200mm available in 12mm & 15mm & 18mm Thickness.

Sheet size: 2700 × 1200mm available in 12mm

Black Firesafe MDF - Sheet size: 2400 × 1200mm available in 12mm & 16mm Thickness.

Density: 700 kgs/m³

Acoustic Perforations:

When combined with our standard perforations or any custom designs it is possible to achieve perfect acoustics for any space. Additionally, Decoustic 85 felt is bonded to the back of the panels as standard to further increase the acoustic properties.

Finishes available:

Firesafe MDF can be customized with any of our extensive selection of veneers, providing a sophisticated timber-look finish. Alternatively, it can be completed with one of our premium paint finishes, available in Satin or Matte, to achieve your desired aesthetic.

Sustainable Design:

Firesafe MDF is environmentally friendly and produced under an environmental management system that is certified to ISO 14001 and is FSC certified.

Precautions & Limitations:

Firesafe MDF panels are for interior applications only, they are not recommended in exposed, damp or wet conditions as they can swell and break when in contact with water. They may warp or expand if not sealed.
