

EUROSTYLE®

panelok®

Architecturally Inspired Negative Detail Metal Wall Interlocking Panel System

Eurostyle® panelok® is Roofing Industries latest innovation within the Eurostyle® stable of products. panelok® is an external and internal negative detail metal wall and cladding system, providing building designers with a modern and stylish cladding option. The stunning visual effects attributed to the panelok® walling system ultimately complements both residential and commercial architectural appeal.

Manufactured in varying widths, metal substrates and with an extensive selection of appealing surface colours and pre-paint finishes. The variable negative detail spacing options range from 0mm to 25mm and ensures designer flexibility and simplicity around cladding penetrations.

Eurostyle® panelok® pan widths

215mm, 255mm (standard), 265mm and 400mm.
For other widths, contact Roofing Industries.
