ETERPAN®

Coastal Series

eterpan is a multi-functional medium density fibre cement sheet designed for a wide range of applications including external cladding, base for stone and brick slips, soffits, decks, internal linings, flooring, and rigid underlay. Crafted using an advanced "Flow On" production process and autoclaved at high temperatures and pressure, ETERPAN® offers exceptional strength and resistance against delamination.

In addition to its superior performance, ETERPAN® meets the requirements of E2/AS1 Acceptable Solution and complies with Australian/New Zealand Standard, classified as type A under AS/NZS2908.2 standards.

ETERPAN® is made with flow on technology vs hatschek. Some of its other benefits are:

- Easy to install
- Mould resistant
- Fire retardant
- Impact resistant
- No Volitile Organic Compounds (VOC's)

It is made of:

- New Zealand cellulose fibre
- New Zealand Portland cement
- Sand
- Water

It can either be used in its own right as a cladding and painted to your specification or it can be used as a substraight for other building materials such as tiles, brick and flooring.
