

Touch-free swing doors from dormakaba

Upgrade your standard swing door to an automatic door in a flash. The touch-free magic switch is compatible with all dormakaba swing door operators.

PORTEO

The PORTEO offers a convenient way to open doors effortlessly and to close them automatically. The PORTEO is specifically suited to light doors inside a home or small office, performing all the functions needed to make life just that little bit easier for all.

Easy opening and closing of swing doors up to widths of 1100 mm and door-leaf weights of up to 100 kg.

ED Series

Fully-featured swing door operators for commercial applications.

The ED100 and ED250 units are especially suitable for exterior doors that are subjected to varying wind loads and for interior doors separating rooms where different air pressures prevail.

The ED 100 and ED250 can be integrated into a security network with a card reader for access etc.

Inexpensive transportation and easy mounting thanks to the system's reduced weight.

Low-noise unit thanks to multi-stage gear.

Elegant visual appearance: dormakaba Contur design provides for an operator height of only 70 mm.

For single- or double-leaf swing doors.

The pull version with slide channel and the push version with standard arm are both suitable for use on fire and smoke doors .

Thanks to its low- and full-energy versions, the system is suitable for automating both rarely and heavily frequented internal and external doors.

High torque for fully automatic swing doors with radar motion detector actuation .

ED100

Easy opening and closing of swing doors up to widths of 1100 mm and door-leaf weights of up to 106 kg.

ED250

Easy opening and closing of swing doors up to widths of 1600 mm and door-leaf weights of up to 400 kg.
