

DORMA ED 400IG

—
Automatic floor closer

With the ED 400ig Automatic Floor Closer, applications can meet access requirements and maintain a classic look at the same time—such as an arched door or an all-glass façade. This revolutionary operator conceals the automatic components in the floor near the door threshold.

The ED 400ig functions in either low energy or full power mode, and can be used in both new construction and retro-fit applications. DORMA partnered with Opcon Manufacturing Systems to construct a closer that directs the energy generated by the ED 400ig drive unit to the pivot in a rotating motion, thus allowing consistent, smooth operation.

The install box that stores the operator is completely weather proof and is only 7" deep. Product features include Push & Go, Power Close, and Lock Interface. All ED 400 operator functions, such as Push & Go, PowerClose, and Lock Interface, are fully available in this application, which DORMA is nonetheless able to offer at a value-conscious price.
