

THE SMART SOLUTION FOR DURABLE DECKS

Deck framing made easy with an aluminium joist, bearer and jack system designed for builders, by a builder.

PROFRAME ALUMINIUM JOIST SYSTEM

An aluminium joist and bearer system with an easy, one-size-fits-all design that supports timber decking, composite decking and structural tiles.

COST-EFFECTIVE

- Save with the right fit every time
- Lower labour costs overall
- Lightweight and easy to install

QUICK & EASY

- Simple one-size-fits-all design
- Connects using just two brackets
- 75% faster to install than timber

DURABLE

- Aluminium joists powder coated for durability
- Will never warp, twist, cup or bow over time
- Twice the span, with half the height

MADE FOR BUILDERS

- Made by a NZ builder, for builders
- Designed to be constructed by you on site
- Supports timber or composite decking and structural tiles
