BUILDING PRODUCTS

Designed and manufactured in Australia

*Escherichia coli (E.Coli), Staphylococcus aureus (Golden Staph), and a host of microorganisms tested

Healthcare Access Panels

COMO Healthcare – Anti microbial access panel

Designed and manufactured in Australia by **COMO Building products**, the **Healthcare Access panel** has a **scientifically formulated Antimicrobial coating that prevents the growth of bacteria, mould and yeast.**

The coating works efficiently as a long- term antimicrobial, providing a barrier to infection and improved safety and hygiene maintenance where infection control is paramount.

- ✓ Kills 99.9% of E.Coli and Golden Staph on contact
- ✓ Susceptible microorganisms include Salmonella, Pneumonia, Legionella & Pseudomonas aeruginosa (respiratory and urinary tract, skin infections etc)
- ✓ Permanent antimicrobial effect
- ✓ Effective hygiene management between clean-down cycles

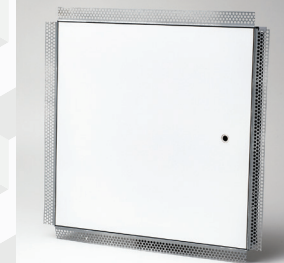

+ Airtight | Secure | Acoustic | Tile-in

Airtight (Isolation areas)

The FMA Airtight Series is a sealed access panel designed for use in areas with a need to maintain air pressure differentials. The access panels have been shown to help maintain a constant 30 Pascal air pressure differential.

- Dual layer airtight seals
- MR MDF door in white undercoat finish
- Square key budget lock or airtight key lock

Secure (Mental Health)

Designed and manufactured in Australia from heavy duty components, the MSA model is ideal for use in correctional facilities, mental health wards and many other secure environments.

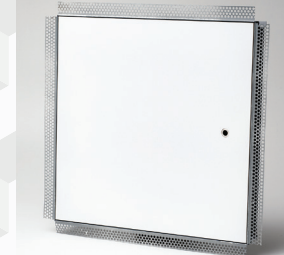

- Anti-ligature and anti tamper
- Stainless steel piano hinge
- Lockwood 213 deadlocks

General use (General wards/areas)

The general use acoustic access panel, is designed for installation into plasterboard walls and ceilings specified with, or without, an acoustic rating of RW31. Available in both set bead and flanged edge welded steel frames.

- Acoustic rated – RW31, 45 or 51
- Quality steel frame and hardware provided
- Moisture resistant EO MDF as standard

Tile-in (Bathrooms, pools/hydrotherapy)

Designed for use where access is required through a tiled surface. Finished in either zinc or stainless steel finish, the Tile-in Access Panel is supplied with a steel pivot pin hinge system to ensure the tiles do not foul against the frame when opening the door.

- For use in bathrooms to conceal access into a tiled wall
- Tile depth standard 12mm or 20mm
- Key lock or touch latch available
