Made in Aotearoa for a sustainable future

Econa is made in Aotearoa New Zealand with 100% ECONYL® regenerated fibre. ECONYL® is recycled from nylon 6 waste materials including discarded fishing nets, fabric scraps and industrial waste.

- tufted cut pile twist
- 64oz or 48oz
- 3.66m wide broadloom
- 100% regenerated yarn
- 15-year residential/multi-resi warranty, 8 year light commercial warranty
- durable, fade and stain-resistant
- no minimum quantity order, in stock lead +/- 1 week

Rescue

The ECONYL® regeneration system starts with rescuing waste, like old carpets, fishing nets, fabric scraps and industrial plastic that would otherwise pollute the Earth. That waste is then sorted and cleaned to recover all of the nylon possible.

Regenerate

A cutting-edge chemical recycling process transforms nylon waste back into brand-new nylon. Unlike traditional mechanical methods, this technique enables ECONYL® regenerated nylon to maintain 100% of the properties of new nylon while eliminating the environmental impact of producing more conventional oil-based nylon. This innovative process provides premium quality whilst allowing environmental responsibility to thrive in a sustainable cycle.

Remake

ECONYL® regenerated nylon is spun into yarns or processed into polymers for limitless nylon applications. Its versatility and functionality stretch across diverse industries, such as interiors, automotive, fashion, hospitality, transportation and logistics, and many more. Marked by excellence, quality and design, ECONYL® regenerated nylon provides the unique raw material to inspire and empower your creation.

The ECONYL® Regeneration System

ECONA 48oz and 64oz

Cut Pile

Taking 2 or more pieces of yarn (or piles) and tightly twisting them together, this method creates the most durable carpet with a textured look and reduced tracking & shading compared to loose cut piles.

Luxurious Feel

Crafted from luxurious semi-soft touch nylon, this material is available in two premium weight options—6kg (48oz) and 8kg (64oz)—offering a plush, soft feel underfoot.

UV Resistant

With Colourfast fibres the carpet is resistant to UV exposure and won't experience fading over time.

NZ Made

Created in New Zealand, with the finest local craftsmanship. Accessible to specifiers across the country, we guarantee that every part of New Zealand can experience the comfort and excellence of this outstanding product.

Extra Heavy Duty

Having been awarded an Extra Heavy Duty, rating from ACCS the Econa range is designed to stand the test of time in high-traffic areas.

Stain Resistant

Stain resistance is a fundamental element of a good-quality carpet. Solution Dyed Nylon fibres resist staining and are easy to maintain.

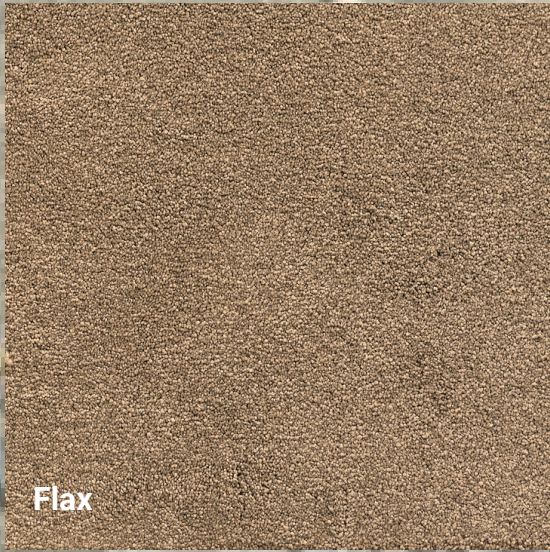

Inspiration

The Econa range offers eight classic and timeless colours, thoughtfully designed for residential, multi-residential and light commercial interiors

Environmental Impact

The Environment Certificate Scheme establishes a new benchmark for environmentally conscious practices in carpet manufacturing. It features five progressive levels: ECS 1, ECS 2, ECS 3, ECS 4, and ECS 5.

The program assesses flooring products based on their environmental impact throughout their entire lifecycle, from raw material extraction to disposal. ECS-certified products adhere to stringent criteria, including reduced greenhouse gas emissions, sustainable material sourcing, energy efficiency, and waste reduction. The program also promotes continuous improvement and innovation among manufacturers to minimize their environmental footprint. By selecting products certified by the ECS program, you can feel assured that you are making an environmentally responsible choice. The ECS program represents a significant move towards a more sustainable flooring industry in Aotearoa New Zealand. The Econa range meets the strict criteria of the Environment Certificate Scheme test being rated a Level 4 Rating.

The Econa range is made using the solution-dyed nylon type 6 fibre, which can be regenerated infinitely into new nylon fibres.

Carpet care guide

METHOD

1. DRY CLEANING FLUID
2. NAIL POLISH REMOVER
3. MILD LIQUID DETERGENT MIXED WITH TWO CUPS OF WATER.
4. LUKEWARM TAP WATER.
5. VINEGAR SOLUTION ONE CUP VINEGAR TO TWO CUPS WATER.
6. AMMONIA SOLUTION TWO TBSPS. HOUSEHOLD AMMONIA TO ONE CUP OF WATER.
6. DRY STAIN REMOVER
7. PROFESSIONAL CLEAN ADVISED

STAIN

ACNE MEDICATION: 1,3,6,5,4,7
ALCOHOLIC BEVERAGES: 3,6,5,4,7,
BLEACH: 3,4,8

URINE DRY: 3,4,5,6,7
VOMIT: 3,6,5,7
WINE: 4,3,5,7

ALL CARPETS ARE WARRANTED AGAINST MANUFACTURING DEFECTS

The carpet should provide satisfactory wear, and be free from manufacturing defects for the years as stated below. The carpet will retain at least 90% of its pile fibre for the years as stated below.

Econa 48oz & 64oz

Residential: 15-Year Warranty

Light Commercial: 8 year Warranty

Subject to:

Regular maintenance, protection from strong sunlight and normal wear and tear.

The Remedy:

All faulty products will either be replaced, or repaired at no cost, and with a minimum of inconvenience to the customer.

Expectation:

The more you can move the pile with your hand the more the carpet will show the difference where you walk and where you don't. All cut pile carpets will shade and track. However, a 2 ply short and dense pile will shade and track a lot less than a long loose pile. A velour (plush) pile is designed to shade. This is a feature of the carpet if a luxury look is required. As the plush pile continuously moves it will disguise tracking as it creates a velour design. Loop pile constructions do not show tracking and shading the same as cut pile constructions do.

You need to know:

The best carpets are made from a 2 ply yarn and are of a short and tight construction, either 100% wool, or 100% Solution Dyed Nylon, such as the yarn used in the Econa range, are best. We do not recommend cut-pile polypropylene, cut-pile polyester or any product made from acrylic. Alternate fibres are a way to make carpet cheaper, not better.

Regular maintenance to keep your carpet looking better for longer:

Vacuum all of your carpet regularly, including behind beds, doors etc. We recommend that you use a 'turbo head' on loop pile carpet once every 2 months and on a cut pile every 4 months. This ensures that all the spare fibre is removed. It is important to use a good vacuum cleaner.

Carpet Beetles:

Synthetic fibres are not affected by carpet beetle. Wool carpets can potentially be damaged by both moths and carpet beetles. Regular vacuum cleaning will help prevent damage. Spraying the edges with carpet and bedding spray is strongly recommended (available from the supermarket in the pet department).

Common sense:

Strong sunlight will fade carpets, fabrics and furniture. Solution dyed fibres are more resistant than others.

Carpets not protected from castor chairs will be void of warranties.

Peaking joins are a natural occurrence in your installation. Certain light falls can accentuate this giving a sand dune effect. This may be perceived as a colour variation on the join.

Like other fabrics, carpets will vary in colour and/or texture from dye-lot to dye-lot and from the supplied sample.

If we are providing an installation service for you, the installation is warranted for the time period equal to your carpet warranty.

We endorse and recognise all rights of the consumer under the Consumer Guarantees Act 1993 (the "CGA") in New Zealand.
